

■ MIPA™ and MegaTrack® in the Law Office: Print & Copy Tracking for Client Billing

Many Law Offices want to bill clients for providing legal documentation in printed form. In some cases this could include all pages printed, whether they are “originals” from a printer, or duplicates made at the MFP/copier. In other cases it may apply only to duplicates and multiple copies requested by the client. Sometimes it is desirable to track and bill for faxed and scanned material as well.

Whatever your needs, the newest generation of HP MFPS – such the 4345MFP and 4730MFP – can be combined with Capella Technologies’ new MegaTrack In-Printer Agent Personal Identification Number (MIPA PIN) and MegaTrack, to provide the most complete and cost effective solution on the market.

MIPA PIN is a compact flash card that installs directly into the HP MFP. It controls and tracks all “walk-up” use of the MFP: copying, scanning, faxing, e-mailing, etc.). MIPA PIN provides complete details on each individual use or “job:” user ID, client code, matter code, date and time, page counts in color or black and white, page size (legal, letter, tabloid, etc.), and more.

If you need to track client- and matter-code for prints as well as copies, the optional MegaTrack software package includes an Allocation Module for each client PC. It allows you to select the desired client and matter codes (or other identifiers as needed) each time you send a print job.

The MegaTrack Reporting Tool™ resides on a client and provides all your print and copy data in various reports. It is included as part of MIPA PIN. Reports can be organized by user, by client, by matter code... however you want to see the data. Reports can even convert page counts to dollar amounts based on the cost-per-page prices you set... and you can have these reports automatically e-mailed to your billing department (or whomever you wish) on a regularly scheduled basis.

Now for the best part... a MIPA PIN compact flash with the MegaTrack Reporting Tool provides a complete copy and print tracking system for a single MFP at only \$250. Starting at \$600 you can add the MegaTrack Light software package and not only allocate costs by client or project, but track all printers in your office. That is as little as \$850 for a complete tracking system for your entire office.
