

■ JM MicrDIMM®

Business Partner

To be truly successful, a comprehensive ERP strategy must incorporate both a company's A/P and payroll functions. While enterprise applications from companies like SAP, Baan, Oracle and PeopleSoft can certainly manage the data required to support these tasks, most offer limited output capabilities requiring dedicated printers and costly pre-printed forms. Fortunately, there is another option — Capella Technologies JM MicrDIMM.

Print Professional Quality Checks on HP LaserJet Printers

Compatible with Windows, Unix, AS/400 and mainframe environments, the JM MicrDIMM gives you the ability to output professional quality checks — complete with industry standard MICR encoding — on a wide array of popular HP LaserJet printers. Fully supported by SAP R/3 and compatible with applications from Baan, PeopleSoft, J.D. Edwards and Oracle, it's the easy way to integrate cost-effective, flexible, check printing capabilities into your ERP strategy. No more hassling with dedicated printers and pre-printed check stock. No more changing check stock any time you need to change accounts. JM MicrDIMM delivers comprehensive check printing capabilities while leveraging your existing hardware and software investments.

Easy Installation

For a solution that's this functional and powerful, the JM MicrDIMM is remarkably easy to implement. Simply install the DIMM into an available memory slot on a compatible HP LaserJet printer. The firmware on the DIMM instantly gives the printer the ability to output CMC-7, E13B, OCR-A and OCR-B symbols, providing compatibility with all major check sorting systems.

Professional Quality

Of course, being able to print MICR symbols is only part of the challenge. The JM MicrDIMM Additional flash memory may be requested for storing signatures, logos and other graphics as well as special fonts.

Ideal for SAP R/3

HP LaserJet printers equipped with JM MicrDIMM are directly supported by SAP R/3. The result is an SAP check printing solution that's practically plug and play. Factor in the JM MicrDIMM's easy installation, and your users will be printing professional quality checks in no time.

Security Options

Worried about fraudulent check printing? The JM MicrDIMM solutions offers a number of available security options, including support for hardware keylocks and restricted access to signatures. Other features, such as support for MICR toner sensors, help to ensure check quality.

Versatile and Efficient

Even with the JM MicrDIMM installed, your HP LaserJet printer is still able to print regular business documents, enabling you can make the most of your printer investment. This versatility also opens up a whole new world of options when printing checks. Simplify your mailing processes by printing checks with attached statements or customer letters. Easily change configurations and/or accounts from check to check. And should your printer ever need repairs or maintenance, you can simply move the JM MicrDIMM to another HP LaserJet printer, helping you to avoid costly downtime.

About Capella Technologies, Inc.

Capella Technologies provides Document Output Management & Job Accounting products which enable companies to format, print, monitor, allocate, archive, distribute and secure business-critical documents in the most cost-effective way possible.

With our 25+ years of industry experience, our long-standing relationship with Hewlett Packard, and our extensive expertise in legacy/ERP system integration, we can help your company to:

- Streamline printing processes
- Reduce overhead costs
- Enhance document/data security
